Never stop learning. If you start with a fixed sum divided in two parts and then changed this division without changing the initial sum, both parts must move in a proportionally inverse amount: Arghiri Emanuel said beautifully that mathematics are the shorthand of logic, and for this reason the most complex

mathematics cannot argue against arithmetical and logical evidences, unless they are used to mask a philosemite Nietzschean obscurantist and socially harmful narrative. Thank you. You can multi-task at it while you're making dinner, but the secret of a great relationship is some focused time every day attending only to that child.
